"I have especially come to appreciate the EquCellpen when treating irritating scars or fibrotic tissue. Its method of action complements manual medicine quite well.

In the hands of a trained professional, I consider it to be an effective and efficient therapeutic tool."

Dr Larissa Vicart

Treasurer EVSO, Trustee at camvet.ch

Christian Struchen SA, Equine Sport Medicine & Osteopathy

"I use the EquCellPen to treat tendon and ligament injuries, but also for tension in the neck and back area, or for malanders.

The EquCell case is very handy and I can carry it everywhere with me, so I can always use the pen on my horses."

Alexander Schill

German show jumper

"I like to use the EquCellpen for selective support of my manual physiotherapy techniques. Especially for chronic soft tissue problems (muscles, tendons and ligaments), I have had good experience with training my patients' owners to use the EquCellpen and having them continue the therapy at home alongside physiotherapy exercises."

Dr Simone Zulauf

Veterinarian and federally certified animal physiotherapist

Physio For Friends, animal therapy

"The first thing I did with the EquCellpen was to treat Pauli's sweet itch. The pony was suffering from severe itching and open patches on the mane crest. We tried lots of things, but nothing really helped. After three weeks of EquCell therapy, all of the eczema was healed."
